

SISAP - Sistemas Aplicativos

Informe de Evaluacion Evaluacion de Vulnerabilidades Externas

Cliente: Cliente Demo S.A.

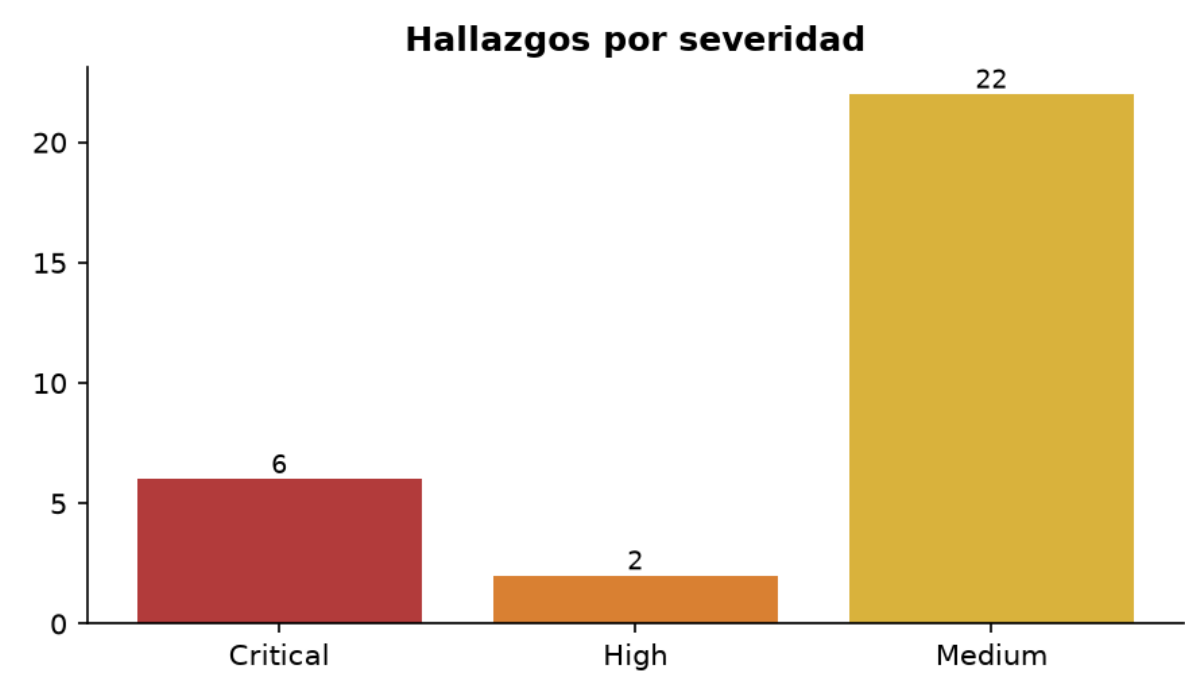

Consultor: Gabriel Cifuentes

Fecha de la revision: 13/01/2026

Resumen Ejecutivo

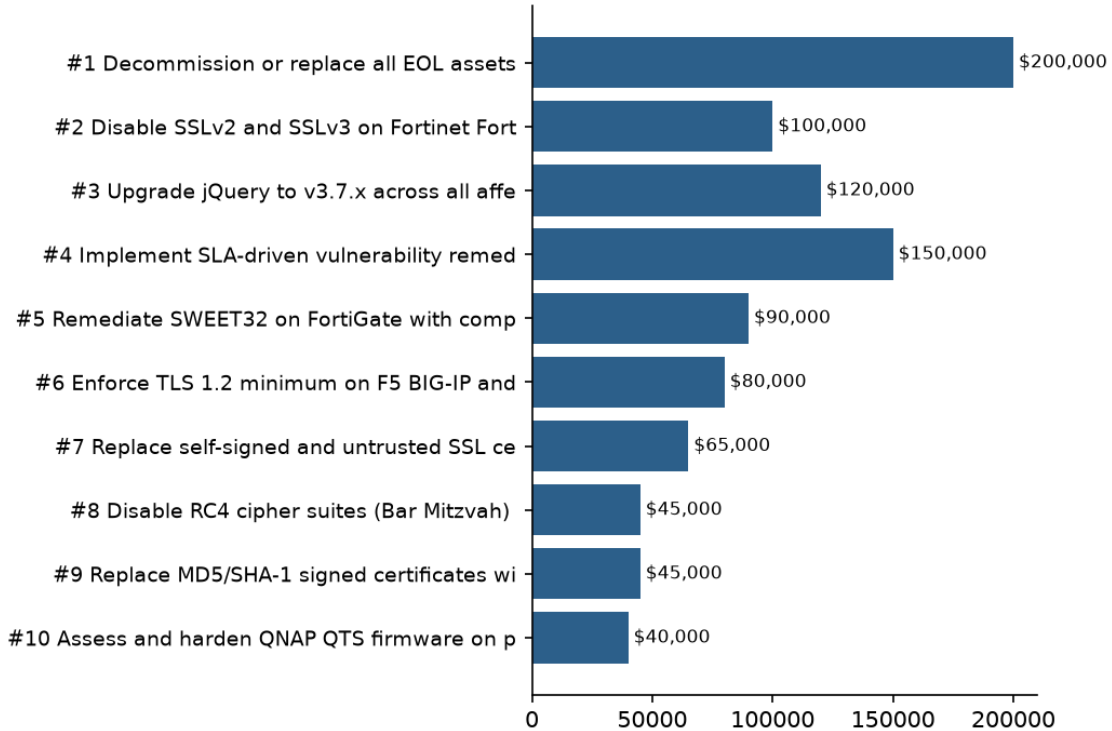

Nivel de riesgo mas alto	Hallazgos totales	Reduccion de riesgo estimada	Activos afectados
Critical	30	\$935,000	30

Hallazgos por severidad

Recomendaciones Priorizadas (Top 10)

Reduccion de riesgo estimada por recomendacion

#	Recomendacion	Severidad	Reduccion de riesgo	Plazo
1	Decommission or replace all EOL assets	Critical	\$200,000	30-60 Days
2	Disable SSLv2 and SSLv3 on Fortinet FortiGate	Critical	\$100,000	Immediate (1-7 Days)
3	Upgrade jQuery to v3.7.x across all affected web servers	Critical	\$120,000	7-30 Days
4	Implement SLA-driven vulnerability remediation program	Critical / High / Medium	\$150,000	30-60 Days (Program Establishment)
5	Remediate SWEET32 on FortiGate with comprehensive cipher hardening	High	\$90,000	Immediate (1-7 Days)
6	Enforce TLS 1.2 minimum on F5 BIG-IP and Microsoft Windows	High	\$80,000	7-14 Days

#	Recomendacion	Severidad	Reduccion de riesgo	Plazo
7	Replace self-signed and untrusted SSL certificates with CA-issued certificates	Medium	\$65,000	7-30 Days
8	Disable RC4 cipher suites (Bar Mitzvah) on FortiGate and Microsoft Windows	Medium	\$45,000	Immediate (1-7 Days)
9	Replace MD5/SHA-1 signed certificates with SHA-256 or stronger	Medium	\$45,000	7-30 Days
10	Assess and harden QNAP QTS firmware on primary public web presence	Preventive	\$40,000	7-30 Days
